Education

VNR Vignana Jyothi Institute of Engineering and Technology
B.Tech in Computer Science and Business Systems | CGPA: 9.02/10

November 2022 – Present

Narayana Junior College
Intermediate in MPC | GPA: 9.8/10

2020 – 2022

Experience

Google - SWE Intern @ GCP: AI and Computing

June 2025 – August 2025

- Implemented traceability across distributed microservices with iterative code reviews and releases.
- Automated debugging workflows with Go, Python, Kubernetes, and E2E tests, reducing manual overhead by 90%.

Stalcon Solutions - DevOps Intern

May 2024 – August 2024

- Built AWS/Docker-based CI/CD pipelines, reducing deployment time by 60% and removing manual configuration.

Achievements

- **Google Women Engineers (WE) Program:** Ranked in the **top 1%** among 25,000+ applicants; awarded 2 year mentorship opportunity and a scholarship worth **Rs. 1,00,000**.
- **JPMC Code For Good Hackathon:** Led a team to win **1st place** among competitors by developing a Generative AI and web scraping-powered application that enhanced NGO donor management.
- **BVRIT Yukti Hackathon:** Secured **3rd place** for building an agriculture-based web service facilitating efficient tool-sharing and resource optimization.

Projects

Open Research Nexus

- Developed a full-stack platform for decentralized research collaboration, integrated with AI-powered tools to provide robust search capabilities, writing autocomplete functionality, as well as dynamic smart analytics and plagiarism statistics.
- Built using Python, React, Redux, JWT and firebase for scalability.

Document based RAG Voice Assistant Chatbot

- AI RAG-based system that combines voice interaction capabilities with the retrieval architecture to provide answers grounded in a specific set of documents.
- Used TTS, STT, Semantic search, and LLM chatbot integration.

Accessible Computing Interface

- Developed and published a multi-modal interface using computer vision, speech recognition, and custom key mappings to control the system via eye movement, voice commands, and a virtual keyboard.
- Integrated OpenCV, PyAutoGUI, Vosk and Electron-based desktop application.

Technical Skills

- **Programming Languages:** Python, Go, Scala, Java, C++, JavaScript, R, Object Orientation
- **AI/ML & Data:** TensorFlow, NLP, RAG, NumPy, Pandas, Scikit-learn, PyTorch, AI Agent, GraphQL, LangGraph
- **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, Git, GitHub Actions, Jenkins, Distributed Systems, Networking
- **Web Technologies:** React.js, Angular, Flask, Phoenix, gRPC, Tailwind CSS, MongoDB, MySQL, DBMS

Certifications: Product Management by Google (in progress), MERN Stack Development.

Leadership & Extra-Curricular

Vice President, Street Cause VNRVJIE

- Coordinated fundraising initiatives supporting schools, underdeveloped areas and orphanages.

Executive Board Member, CSI VNRVJIE and Designathon

- Lead workshops and national-level events for over 600 students, enhancing technical and career-oriented skills.

Tech Lead and Event Organizer, TEDxVNRVJIE

- Played a vital role in organizing motivational events featuring eminent speakers.

Research Work

Multi-Agent framework for enhanced epistemic robustness in LLM based decision making - Ongoing

Developed a multi-agent framework with adversarial deliberation to improve reliability and reduce bias in LLM-based decision-making, including a fine-tunable library trained on legal datasets to simulate courtroom scenarios. Evaluated epistemic robustness using agent-consensus scoring and adversarial prompting benchmarks.
